

SAFETY PROGRAM SELF-ASSESSMENT

Where Does Your Safety Program Stand Today?

A quick, honest look at your program across six areas — no jargon, no judgment. Answer each item with **Yes**, **Partial**, or **No**, tally your score, and use the guide at the end to see where to focus next.

Scoring: Yes = 2 points · Partial = 1 point · No = 0 points · 30 items, 60 points possible

01 Written Programs & Policies

Checklist Item	Yes	Partial	No
We have a written Hazard Communication Program, including a chemical inventory and SDS access for every employee.	[]	[]	[]
We have written procedures for our top hazards (e.g. Lockout/Tagout, Fall Protection, Confined Space, PPE) relevant to our work.	[]	[]	[]
Our written safety programs are reviewed and updated at least once a year.	[]	[]	[]
New hires receive a documented safety orientation before they start work.	[]	[]	[]
Our safety policies are easy for employees to find and understand — not buried in a binder no one opens.	[]	[]	[]

02 Training & Communication

Checklist Item	Yes	Partial	No
We hold regular safety training or toolbox talks, at least monthly.	☐	☐	☐
Training topics are tailored to the actual hazards our crew faces, not generic content.	☐	☐	☐
We keep documented records of who attended what training, and when.	☐	☐	☐
Supervisors are trained to reinforce safety expectations in the field, not just HR.	☐	☐	☐
Employees know exactly who to go to with a safety question or concern.	☐	☐	☐

03 Hazard Identification & Reporting

Checklist Item	Yes	Partial	No
We conduct regular jobsite or facility safety inspections — not just after an incident.	☐	☐	☐
We have a simple way for employees to report hazards or near-misses without fear of blame.	☐	☐	☐
Reported hazards are tracked until they are actually corrected, not just noted.	☐	☐	☐
We investigate incidents and near-misses to find root cause, not just to close the file.	☐	☐	☐
We can quickly name our top three workplace hazards right now.	☐	☐	☐

04 Recordkeeping & Compliance

Checklist Item	Yes	Partial	No
We maintain accurate OSHA 300 / 300A logs if required for our business.	☐	☐	☐
Our SDS library is current and accessible to every employee, on every shift.	☐	☐	☐
We know our current OSHA recordable incident rate (or DART rate).	☐	☐	☐
We are confident our records would hold up in an OSHA inspection tomorrow.	☐	☐	☐
We track certifications and required training expirations (forklift, confined space, etc.).	☐	☐	☐

05 Emergency Preparedness

Checklist Item	Yes	Partial	No
We have a written, posted emergency action plan.	☐	☐	☐
Employees know evacuation routes and meeting points.	☐	☐	☐
Emergency contacts are current and accessible — not on a sheet from three years ago.	☐	☐	☐
We have functioning first aid supplies and trained first aid / CPR responders on site.	☐	☐	☐
We have reviewed or practiced our emergency plan in the last 12 months.	☐	☐	☐

06 Program Oversight & Culture

Checklist Item	Yes	Partial	No
Someone at our company is clearly responsible for safety, with real time carved out for it.	☐	☐	☐
Leadership visibly supports safety — not just a poster on the wall.	☐	☐	☐
We track our workers' comp premium and Experience Modification Rate (EMR), and know if it's trending up or down.	☐	☐	☐
We could explain our safety program to a new client or insurance auditor with confidence.	☐	☐	☐
We have a plan for what “good” looks like a year from now, not just today.	☐	☐	☐

My total score: _____ / 60

WHAT YOUR SCORE MEANS

Score Interpretation Guide

0–20

Ground Floor

Your program has real gaps that put you at risk for both injuries and OSHA exposure. This is the highest-value place to start — most businesses at this stage benefit from hands-on, heavy-lift support (Safety Executive or Safety Embedded).

21–35

Building

You have some pieces in place, but there are real gaps in documentation, training, or oversight. A dedicated fractional EHS Manager (Safety Partnered) can close those gaps fast.

36–48

Solid Foundation

Your basics are working, but they need regular reinforcement to stay current through growth or turnover (Safety Guided).

49–60

Strong

Your program is running well. You mostly need an expert on standby for check-ins, questions, and staying current (Safety Standby).

This assessment is a self-guided planning tool, not a compliance audit or legal determination of OSHA compliance. It's meant to help you see where to focus — a full picture usually takes a conversation with a Certified Safety Professional.

Want a Second Opinion on Your Score?

Schedule a free 30-minute call with Aaron Leff, CSP — 25+ years of EHS experience. We'll walk through your results together and talk through what actually matters most for your business first.

No pressure, no sales pitch.
